Screening for Anal Dysplasia and Cancer in Adults With HIV

August 2022

**Figure 1: Follow-Up of Anal Cytologic Screening Results** [a]

- **Abbreviations:** ASC-US, atypical squamous cells of undetermined significance; HPV, human papillomavirus; HRA, high resolution anoscopy, HSIL, high-grade squamous intraepithelial lesion; LSIL, low-grade squamous intraepithelial lesion.

- **Notes:**
  a. The figure describes recommended screening and follow-up for the following individuals with HIV who are ≥35 years old: men who have sex with men, women, transgender men, and transgender women.
  b. Continued annual clinical assessment and anal cytology, with annual HRA, is recommended for patients with a history of HSILs as long as life expectancy exceeds 10 years.
